

The **Max Planck Institute for Biology of Ageing, Cologne**, is seeking candidates for a position as

DEPARTMENT DIRECTOR

in the field of integrative ageing research. Areas of interest include, but are not limited to: stem cell ageing, dormancy models, inflammation, senescence, computational and system biology of ageing. The successful candidate will be expected to have a strong research profile in these or related areas in ageing research, with opportunities for links to ongoing research at the Institute.

The Max Planck Institute for Biology of Ageing was founded in 2008 with the mission to unravel fundamental mechanisms of healthy ageing. It is part of a network of institutions in Cologne dedicated to ageing and age-related diseases, constituting a vibrant and collaborative environment. Equipped with state-of-the-art core facilities, it provides outstanding opportunities for its scientists. At the moment, we host more than 300 employees from 30 different nations.

Applications, letters of interest, and nominations of candidates should be sent to Kira Gutowski, Max Planck Institute for Biology of Ageing, Joseph Stelzmann Str. 9b, 50931 Cologne, Germany (KGutowski@age.mpg.de) by **June 30th, 2023**.

The Max Planck Society for the Advancement of Science is an independent, non profit research organization that primarily promotes and supports basic research. The Max Planck Society is an equal opportunity employer and is committed to diversity and inclusion in all aspects of recruiting and employment. The Max Planck Society is aiming to increase the percentage of women among its scientific leadership, particularly at the director level. Therefore, we strongly encourage expression of interest from and nominations of qualified female scientists.
